

THE ART OF TEACHING WALDORF at Woodland Star

The Art of Teaching at Woodland Star provides overviews of each grade and its integrated curricular themes, clarifies rationales for backward-design lesson planning and prepares teachers to deliver artistic lessons, considering learning outcomes, activities, and assessment. Teachers will feel prepared for the upcoming year and have the opportunity to network and collaborate with colleagues after attending our program. Our integrated, dynamic approach to delivering *The Art of Teaching at Woodland Star* courses are based on the principles of *Soul Economy* and maximize our time together.

Our highest endeavor must be to develop free human beings who are able of themselves to impart purpose and direction to their lives.

The need for imagination, a sense of truth, and a feeling of responsibility – these three forces are the very nerve of education.

R. Steiner

*The Seven Core Principles of Public Waldorf Education ([Alliance link](#)) are the foundation of our training courses. Our **The Art of Teaching at Woodland Star** courses develop artistic capacities and an understanding of the creative components of content study. We also offer philosophical understanding and reimagined multicultural curriculum outlines, essential teaching materials via Google Drive, and guidelines for achieving learning outcomes. We focus on the key thematic highlights of each grade and the rationales for curriculum content selection. With an emphasis on the practical, we discuss child development, the Core Principles and latest findings from educational neuroscience to support healthy child development and learning, including how to address learning loss and increase memory and attention capacities. Our program emphasizes structured literacy and project-based learning for building academic capacities in students.*

We offer reimagined culturally inclusive block rotations with suggested reading material, scaffolding strategies for diverse learners, and sample main lesson outlines with rhythms for each grade level. We love to work with visionary faculty seeking to innovate school curriculum as a collective. It is our hope that our participants will find substance and inspiration in our rich and fast-paced courses and feel equipped and empowered continuing their journey on the Waldorf path.
